MD Bike-a-thon

On Thursday the 1st of November the whole school participated in a bike-a-thon to raise money for SCOPE who support people with Muscular Dystrophy which is an illness that affects people’s muscles. Children brought their bikes, their scooters or they ran around the track.

The children did so well adapting to the rainy weather. Thank you to all the children and families that raised money for this great cause. We raised $2500. What a great effort!
